

Instructions of application for ICS data use

Members of ICS Bord welcome all researchers for collaboration. If other scientists would like to use ICS data or stored samples, they are invited to submit their request electronically via email to ICS office. Please read regulations in this regard. The process is summarized in the following algorithm. You need to submit at least three items:

1. Your primary title
2. Your statement of purpose **briefly** describing the background as well as importance of your idea
3. Your primary empty table
4. First and second authors and corresponding author

It is recommended to add your CV too. As diagram shows, it is needed that you get confirmation of our consultant (data expert) at first before sending it to the board members. At this stage the applicability of our data bank with your idea is scrutinized by our data expert.
